# Aryan Chalotra

## IT Engineer

Skilled IT Engineer with strong hands-on experience in providing comprehensive technical support and managing enterprise IT infrastructure. Strong expertise in IT Service Management (ITSM), IT Asset Management (ITAM), User Management, SAP, Hardware Maintenance, Windows Deployment, SCCM, Networking, Linux/Windows Operating Systems, and enterprise system troubleshooting.
Possesses strong domain knowledge of the Pharma industry, including 21 CFR Part 11 compliance, validated systems, and creation/maintenance of IT documentation aligned with regulatory, audit, and data integrity standards.
Additionally, a web developer with over 3 years of experience in designing, developing, and implementing websites and applications.

### WORK EXPERIENCE

**Future Focus InfoTech (FFI) (LUPIN, Jammu)**

**Desktop support engineer** April2024 - Present

- In my role as Desktop Support Engineer, I provide comprehensive technical support, including troubleshooting hardware, software, and network issues, executing regular data backups, installing and maintaining desktop hardware and software, managing user accounts and access permissions, collaborating on IT infrastructure upgrades, providing technical guidance to end-users, and staying updated on emerging technologies for improved support services.
- Managed incidents, service requests, and asset management activities using Symphony AI ITSM/ITAM, ensuring efficient service delivery and asset tracking. Administered user access and machine account management for SCADA and HMI systems through the GxP Digitize UAM platform. Supported secure and compliant IT operations in a regulated GxP environment.
- Maintaining 21CFR Part 11–compliant IT documentation is also part of my daily responsibilities. I prepare and update validation documents, audit-ready evidence, and system documentation to ensure the site remains fully compliant with pharma regulatory and data integrity requirements.
- I also supported the site's complete network revamping project, where I helped coordinate and Manage the team responsible for cabling, wiring, and network hardware setup. This included supervising the installation of switches, ensuring proper network layout, and assisting in resolving on site connectivity issues to maintain smooth operations.
- During December2025 and January 2026, I also managed a site wide project to replace and upgrade All Access Points (APs). This included coordinating with onsite teams, supervising AP removal and installation, ensuring proper network coverage, and verifying stable connectivity across the entire site after deployment.
- Administered the GxP Scheduler application for daily, weekly, and monthly backup reporting and compliance documentation. Conducted audit trail reviews, preventive maintenance tracking, and backup restoration activities to support operational integrity. Managed folder creation, access controls, and backup tape movement within the application. Ensured full compliance with 21 CFR Part 11 requirements through a secure, paperless, and fully digital record management process.

### SKILLS

- IT skills: User Management, Asset management, Hardware Maintenance, Linux OS Administration, Network Troubleshooting (LAN/WAN, TCP/IP), Documentation, 21 CFR Part 11 Compliance.
- IT tools: Windows Server, Linux, Microsoft 365, Active Directory, SCCM, SAP, Antivirus Platforms, Remote Support Tools (Any Desk, BOMGAR, TeamViewer, RDP), VMware, Nmap, Wireshark, Symphony AI ITSM/ITAM, GxP Digitize UAM
- Developer Tools: GIT, Vs Code. Language: C/C++, Java, Html, CSS, JavaScript, SQL, Python.
- Frameworks: React, Bootstrap, Tailwind, Material UI, NodeJS.
- Soft Skills: Problem-solving Communication. Time management Customer handling, Critical thinking.
- Other skills: Skilled in building PC's and troubleshooting
- AI-Assisted Development Tools: Claude code, openAi codex, google antigravity

## EDUCATION

Govt. polytechnic college

3-years diploma In INFORMATION TECHNOLOGY 2020-2023

NIIT

1- year Diploma in Computer Application 2018-2019

CIIIT

Certificate in IOT Dec 2022 - March 2023

## ROJECT

### Home Lab Infrastructure & Virtualization Platform | Proxmox VE / Linux / Windows / Networking | 2026

• Designed and deployed a self-hosted virtualization environment using a **2-node Proxmox cluster** built on HP Thin Clients for learning enterprise virtualization, networking, and system administration.
• Configured and managed multiple virtual machines and containers, including **Pi-hole (DNS ad-blocking)**, **Jellyfin media server** in LXC containers, and **OpenMediaVault (OMV)** as a dedicated NAS/storage VM.
• Implemented **Tailscale VPN** for secure remote access and private network connectivity across services and devices.
• Created a dedicated **Kali Linux VM** for penetration testing, security research, and hands-on cybersecurity learning in an isolated lab environment.
• Deployed multiple **Windows 10 virtual machines** to simulate enterprise endpoints for vulnerability assessment, security testing, and client-server interaction scenarios.
• Gained practical experience in virtualization, containerization, network security, storage management, VPN configuration, system monitoring, and troubleshooting within a self-hosted infrastructure environment.

### Glaze - Nothing OS Inspired Android Utility App | Kotlin / Android Studio / Material Design / Android | 2026

Designed and developed **Glaze**, a native Android utility application inspired by the minimalist design language and visual aesthetics of **Nothing OS** using **Kotlin** and **Android Studio**.
• Built and deployed the application as a standalone **Android APK (DEX-based package)**, ensuring compatibility across Android devices.
• Created a **dynamic wallpaper widget** that generates and applies random pastel and dusty-tone color palettes aligned with the Nothing OS design theme.
• Developed a **network information widget** displaying real-time **Local IP** and **Public WAN IP** addresses for quick device and connectivity diagnostics.
• Implemented a **network discovery and port scanning module** capable of identifying commonly exposed services across the local network, including SSH, SMB, HTTP, HTTPS, FTP, MySQL, RDP, SQL Server, TFTP, and other standard protocols.
• Configured monitoring for **50+ commonly used ports** to help users identify available network services and improve network visibility.
• Focused on responsive UI/UX, lightweight performance, and modern Android development practices while maintaining a visual experience consistent with Nothing OS

### 10N20 ITSM | Node.js / Express / Prisma / PostgreSQL / React / TypeScript / Docker | 2026

Enterprise Full-Stack Architecture & IAM: Architected an enterprise ITSM & Asset Management (ITAM) platform using React, Node.js/Express, PostgreSQL, and Prisma ORM, featuring granular Role-Based Access Control (RBAC) and dynamic IAM asset licensing.

Incident Lifecycle & SLA Automation: Engineered real-time incident & service request workflows with automatic priority matrix (P1–P4 VIP routing), live SLA countdown timers/breach tracking, and multi-tier manager approval pipelines.

Dual-Channel Collaboration & Real-Time Messaging: Implemented synchronized dual-stream communications with customer-facing public updates vs. private internal engineer work logs, accompanied by real-time notification alerts and email dispatches.

ITAM Data Ingestion & Analytics Engine: Built end-to-end IT hardware asset lifecycle tracking with high-throughput Excel/CSV bulk import engines, auto-mapping algorithms for employees/departments, and interactive Kanban boards & executive analytics dashboards.

### Salary & Attendance Management | Node.js / Express / Prisma / PostgreSQL / React / TypeScript | 2026

• Developing an employee salary and attendance management system for managing attendance, payroll periods, leave, LOP deductions, and employee salary records.
• Implemented date-wise attendance tracking, leave management, salary calculations, pending leave balances, and holiday management using an Indian holiday calendar.
• Added payroll and attendance reporting with Excel export capabilities to simplify HR operations and monthly salary processing.
